YOUR PATIENT RESULTS

Please write very briefly about your results in physical therapy here at JVS Rehabilitation Inc.

Prior to the PT I required Botox shots 4x per year to prevent near constant back spasms. My range of motion ~~is~~ was extremely limited and my back frequently hurts. After the PT ~~is~~ ~~back~~ I no longer require Botox shots, my back rarely hurts, and I can move frequently engage in my favorite sports (mountain biking and whitewater canoeing) with no pain. Janice and her team have devised a customized set of exercises that has been wondrously effective. My back is better now than at any time in the last 20 years!

This information will be sent to your physician(s) along with your discharge note.
